About me

Since 2015 I started work as a web developer. I worked as a PHP developer until May 2020. I studied and worked with JQuery, PHP, PHP

OOP, Zend, Smarty, MySQL, SQL, PDO. From May 2016 to May 2020 I worked on programs for internal document system management. My knowledge of database architecture and database design is very well. I can build websites, also document management systems. Since May 2020 I started work as a Senior MERN stack developer. Now in MERN, my experience is for about 3 years. In 2022 I studied Cybersecurity Essential and got a certificate. I'm interested in cybersecurity, and I would like to get start in cybersecurity. I specialize in development, but I'm sure, I can be very well in cybersecurity. I can do also both web development and cybersecurity, if it's possible.
